HOW TO USE THIS DOCUMENT

This is a content-only brief. Hand it to any AI design agent and ask it to build a portfolio website using the text below. The site should include all sections in this document. Visual style is open — pick a design that fits the tone (clean, modern, professional, slightly playful). Keep the voice conversational and human; do not rewrite the copy in stiff corporate language.

ABOUT

A little about who I am

I'm a Computer Engineering student from Pune who got hooked on web development somewhere around my second year and hasn't really stopped since. Most of my time goes into building things with React, Node, and Express — and figuring out how to make them feel fast and intuitive.

I work as a Full Stack Developer at **CodeServeTech Pvt Ltd**, where I get to ship real features for real users. Before that, I trained as a web developer at Corizo, which is where the foundation really started taking shape. The thing I enjoy most is the loop — sketch an idea, build it, watch someone use it, then go back and make it better.

Outside of code I'm usually exploring new tools, reading about system design, or working through a side project. I'm always open to interesting problems and teams that care about craft.

SKILLS

What I work with day to day

Frontend

React.js	JavaScript (ES6+)	HTML5	CSS3
Tailwind CSS	jQuery	React Router	Axios

Backend

Node.js	Express.js	REST APIs	JWT Auth
Mongoose ODM			

Databases

MongoDB	SQL		
---------	-----	--	--

Tools & Platforms

Git & GitHub	Linux	Vercel	Postman
VS Code			

Work I'm proud of

A few projects I built end-to-end and learned a lot from. Happy to walk through the code, design choices, and tradeoffs if you want a closer look.

ShopLux — Premium Fashion Store

Full Stack E-Commerce · Live: <https://shoplux-delta.vercel.app/>

A complete online shopping experience for a premium fashion brand — product catalog, search, cart, checkout, and a clean admin panel. Built end-to-end so it actually feels like a real store, not a demo.

- JWT-based authentication and protected routes for users and admins
- Cart and order flow with persistent state and order history
- Admin dashboard for managing products, stock, and orders
- Responsive UI with Tailwind, optimised for mobile checkout

Stack: React · Node.js · Express · MongoDB · Tailwind CSS · JWT

AI Spend Audit — SaaS Cost Optimizer

Full Stack · SaaS · Live: <https://ai-audit-spend-eight.vercel.app/>

A free audit tool that helps startups and engineering teams cut wasted spend on AI subscriptions. Users plug in their tool stack and get a transparent, no-BS breakdown of where they're overpaying — in under 3 minutes.

- Analyzes 8+ AI tools (Cursor, Claude, Copilot, ChatGPT, Gemini, OpenAI & Anthropic APIs)
- Plan-tier and redundancy detection with right-sized recommendations
- Compares API credits vs. retail pricing and annual-billing discounts
- Clean, minimal landing flow with numbered steps and testimonial proof

Stack: Next.js · React · Tailwind CSS · TypeScript · Vercel

PulseFit Coaching — Fitness Platform

Frontend · Marketing Site · Live: <https://fitness-next-js-website.vercel.app/>

A modern coaching website for a fitness brand offering 1:1 training, mobility, and lean-strength programs. Designed to convert — built with clear program tiers, transparent pricing, and a WhatsApp-integrated contact flow.

- Three program tracks: Strength Reset, Lean & Mobile, 1:1 Transformation
- Tiered pricing (4 / 8 / 12-week) with a highlighted Momentum plan
- WhatsApp-integrated lead form for instant client onboarding
- Responsive, photography-led layout with clean typography

Stack: Next.js · React · Tailwind CSS · Vercel

MY JOURNEY

How I got here

A quick look at the path so far — the jobs, the training, and the schools that shaped the way I build.

● Work Full Stack Developer · CodeServeTech Pvt Ltd

May 2026 — Present

- Building production web apps end-to-end with the MERN stack
- Designing REST APIs, auth flows, and database schemas
- Working with the team on UI, performance, and code reviews

● Work Web Development Trainee · Corizo

Jan 2024 — Feb 2024

- Built responsive websites with HTML, CSS, JavaScript, and jQuery
- Translated brand guidelines into clean, accessible front-end pages
- Got hands-on with the full build-test-ship loop for the first time

■ Education B.Tech Computer Engineering · Nutan College of Engineering & Research

Aug 2023 — Aug 2027

- Core CS: data structures, OS, networks, databases
- Self-driven focus on full-stack web development outside coursework

■ Education HSC (12th) · S.M. Joshi Junior College, Pune

Mar 2023

■ Education SSC (10th) · Sadhana English Medium School

Mar 2021

CERTIFICATIONS

Always learning

Web Development	Udemy
Web Development	Apna College
100 Days of Code: Python Pro Bootcamp	Udemy
Data Science	Internshala
Microsoft Excel (Advanced)	Udemy
Tableau Certified	Tableau

GET IN TOUCH

Let's build something together

I'm open to full-time roles, freelance projects, and interesting collaborations. If you think we'd work well together, drop me a line — I usually reply within a day.

NOTES FOR THE AI DESIGNER

- Use a single profile photo (face-zoomed circular crop). Source filename: Photo.jpeg.
- Keep the writing voice as-is — conversational, not corporate. Don't rewrite copy to sound formal.
- All section headings (About, Skills, Things I've built, My journey, Always learning, Get in touch) should be present.
- Status chip: 'Open to full-time roles' near the hero.
- Hero tagline: 'Hi, I'm Siddhi Kale. I build web apps that actually ship.'
- Primary CTA: 'See my work' (anchor to projects). Secondary CTA: 'Let's talk' (anchor to contact).
- Make every contact channel clickable: mailto for email, tel for phone, WhatsApp deep link, LinkedIn URL.
- Stack badge near hero: 'MERN • Full Stack'.
